## 1. The example

A small airfield in Lower Austria in the "Waldviertel". It is about 0.4 nm south of the village Ottenschlag. Just do not expect too much in this scene, in this airfield there is almost nothing! A small hangar and a paved area in front of the runway and a windsock have it all.

But those who like jumping from airfield to airfield with helicopters or with small GAs, will find a place to land in between times. But be careful! The runway is only 516m long and only for sailplanes and powered sailplanes up to max. 2t AUW allowed! Please also note the arrangements to start on the RWY 03 and the MIL-low level route in the south!

The airfield is operated by the "Union Segelfliegergruppe Ottenschlag"  
<http://www.flugplatz.ottenschlag.at.tf/> From this Web site are the informations submitted.

## 2. The Scenery

The scenery was created entirely new means recorded on location photos.

### Maps

you can find in the directory "Infos" or from the site of the operator:

<http://www.flugplatz.ottenschlag.at.tf/>

## 3. Funktions (summary)

- Photorealistic Scenery
- Compatible with OSM+autogen from PliotBalu
- Night textures and realistic lighting \*)
- openable hangardoor (with [HangarOps Package](#)) \*)
- ATC-Taxilines for AI-Traffic \*)

\*) X-Plane 11, 10 only!

## 4. Installation

Just copy the contents of the compressed file after unpacking in the "Custom Scenery" - folder and run X-Plane again.

To operate the Hangartors (KeyCode = 0) is the addon "HangarOps Package" of BlueSideUpBob required (see credits)

# Austrian X-Plane Design Group

## 5. Empfohlene Einstellungen

To visualize all light effects, HDR should be activated. The higher the settings for "texture resolution" and "airport detail" the better the quality of the scenery but the more affect on the FPS ratio.

## 6. Erforderliche Software:

X-Plane® Version 11, 10.25+ oder 9.7

## 7. Anmerkungen zur Version für X-Plane 9

Unfortunately some functions of the scenery must be disabled for X-Plane 9 and therefore it will not look like on the pictures which where taken with X-Plane 10.25.

## 8. Verwendete Libraries

none

## 9. Empfohlene Addons

Although the scenery will work without any addons, we recommend to use the following ones for the whole experience (pictures taken with addons installed):

OSM Europe osm+autogen by PilotBalu,

Download: [http://simheaven.com/?page\\_id=23](http://simheaven.com/?page_id=23)

to have streets and buildings from OSM and autogen where is no coverage of such data.

Europe Library from LyAvain,

Download von: [http://simheaven.com/?page\\_id=14](http://simheaven.com/?page_id=14)

to see European instead of US buildings.

## 10. Credits

LAMINAR RESEARCH®	für X-Plane®
Ben Supnik	für <a href="#">WED</a> (Version 1.2.1r3 verwendet)
marginal	für sein <a href="#">Sketchup-Plugin</a>
BlueSideUpBob	für sein " <a href="#">HangarOps Package</a> "
C Davis	für seine " <a href="#">GA Aircrafts V8</a> "

alle Mitglieder der AXDG.

### 12. License terms

This scenery is freeware and stays in the possession of the developer/s. Upon installation of the freeware the user accepts the terms of use. It is not allowed to upload the scenery or parts of it to other websites without the explicit permission in writing of the developer/s. Furthermore it is forbidden to use the scenery or parts of it on a commercial basis without the explicit permission in writing of the developer/s. Changes and modifications for the private use are allowed. But it is not allowed to share such changed or modified versions without the explicit written permission from the developer/s.

Apart from that the respective terms of copyright law are applicable.

The developer/s are not responsible for any malfunctions or possible failures of hard- or software in connection with this scenery. In the forum of Aerosoft [LINK](#) the developer/s are available for questions or remarks regarding this scenery but cannot give the guarantee that this scenery will work on all computer systems.

Have fun with arrivals and departures in Ottenschlag

*Gerhard, OE3GSU*
