1. The original

The Heli-Austria heliport on the Timmelsjoch is one of the highest heliports in the Alps and, next to the landing site in Ischgl, is the second highest in Austria. Due to its exposed location and the different surrounding mountain formations, which offer challenging flight conditions, the site is often used for test purposes by helicopter manufacturers.

Another special feature is the weight allowance of the helipad, which is limited to 11,000kg.

Austrian X-Plane Design Group

3. Functions (summary)

- Landing dolly in front of the hangar
- Photorealistic buildings at the airport
- Compatible with PilotBalu's X-Europe V2.0
- Compatible with hd_global_mesh_v4
- Ground textures
- Realistic lighting and night textures.

4. Installation

Simply copy the "LOJH_Martin_8_Hochgurgl" folder in the compressed file to the "Custom Scenery" folder after unzipping.

directory structure:

```
<X-Plane-directory>/
  Custom Scenery /
    LOJH_Martin_8_Hochgurgl
      Earth nav data and other)
```

In the "scenery_packs.ini" copy the scenery directory to the right place,
Save and then restart X-Plane

5. recommended settings

To see the included lighting effects, HDR should be turned on. The higher the settings for "texture resolution" and "airport detail", the better the appearance of the scenery, but the influence on the "frames per second" is higher.

6. required software

X-Plane® Version 11.11+, under X-Plane® Version 12 not testet

Austrian X-Plane Design Group

7. Verwendete Libraries

none

8. recommended addons

Although the scenery works without it, we recommend installing the following addons (the images are taken with these addons):

simheaven_X-Europe-1, -2, -3 by PilotBalu,

Download von: <http://simheaven.com/simdownloads/x-europe/>
