1. The Original

Klagenfurt Airport (also Carinthia Airport or Alpe-Adria Airport, IATA code: KLU, ICAO Code: LOWK) is an international airport in Carinthia, Austria. It is located about 4 km from the center of Klagenfurt in the north of the state capital to 448 m above sea level. The owner of the Carinthian airport mbH are the province of Carinthia (80%) and the city Klagenfurt am Wörthersee (20%).

The airport is located about 4 km north of the Klagenfurt city center and extends over the Klagenfurt city districts Annabichl and St. Peter. The apron is located on approximately 448 müa. The approach from the west takes place just above the residential area of the city parts Annabichl and Wölfnitz, from the east largely via industry area.

2. The Scenery

This scenery is based on the work of "Wachter" (1.2) at X-Plane.org

I have expanded and supplemented the scenery, so that online-flying (eg: at VATSIM) and offline flying is possible with the X-Plane's ATC. The ground textures and forests facilitate the VFR approach. The Ramps are defined in accordance with the Ground chart of VACC-Austria (link: see Readme.txt), although no real fixed positions are used, but the aircraft will be instructed by Marshal.

For version 1.4, our Member "merlin" added the ÖAMTC-Base LOMU that lies between the runway and the highway.

Charts

can be found at <http://www.vacc-austria.org/?page=content/airportinfo&icao=LOWK>. Using this information, the parking positions and taxiways were built in the scene, so that it shall be no problems in online flying.

Austrian X-Plane Design Group

3. Functions (summary)

- ÖAMTC-Air-Rescue-Base LOMU
- Photorealistic Scenery
- Compatibel to OSM+autogen from PliotBalu
- Realistic Ground-Textures on the Airport
- Parkpositions, Taxiways, Runways, usw. compliant to VACC-Charts
- Vehicles at the apron
- realistic markings at he apron and the taxiways
- various buildings in the area
- Nighttextures und realistic Lighting *)
- ATC-Taxilines for AI-Traffic *)

*) X-Plane 10 only!

4. Installation

Just the copy contents of the compressed file after unpacking in the "Custom Scenery" - folder and run X-Plane again.

5. Recommended Settings

In order to see the light effects included, HDR should be turned on. The higher the settings in "texture resolution" and "airport detail" the better the representation of the scenery, but also the impact on the "frames per second" is higher.

"runways follow terrain contours" must be switched off!

Austrian X-Plane Design Group

6. Required Software

X-Plane® Version 10.25+ or 9.7

7. Release Notes for X-Plane 9

Unfortunately some functions of the scenery must be disabled for X-Plane 9 and therefore it will not look like on the pictures which were taken with X-Plane 10.25.

8. Used Libraries

- OpenSceneryX: <http://forums.x-plane.org/index.php?app=downloads&showfile=2226>
- R2-Library: <http://xplane.cz/en/r2-library/>

9. Recommended addons

Although the scenery will work without any addons, we recommend to use the following ones for the whole experience (pictures taken with addons installed):

OSM Europe osm+autogen by PilotBalu,

Download from: http://simheaven.com/?page_id=23

to have streets and buildings from OSM and autogen where there is no coverage of such data.

or

Osm Austria beta4.1 by PilotBalu

Download from: <http://simheaven.com/experimental/>

HD Mesh Scenery v2 by alpilotx

Download from: <http://www.alpilotx.net/downloads/x-plane-10-hd-scenery-mesh-v2/>

Europe Library von LyAvain,

Download from: http://simheaven.com/?page_id=14

to see European instead of US buildings.
