1. Description

To bring in a little bit more 'life' into the sceneries, I build a library with different people for usage in sceneries.

Currently the following 'groups of people' are covered:

Civilians:

- Ground personal (GROUND)
- Passangers (PAX)
- Flight staff (STAFF)
- militaries personal (Austrian) (MIL /OE)

The files in the folder "for scenery" should be copied into the scenery folder to avoid error messages when there is no library.

2. Utilization

The pack allows two kinds of utilization:

As library:

Just unpack the content in the 'Custom Scenery' folder. Then you'll have a new folder on the WED library window named 'People LIB'. Just choose an object and position it in the scenery (all objects are orientated north).

As object:

Simply copy the choosen object and the designated texture into the scenery folder and use it as an usual object.

3. Necessary software:

X-Plane® Version 10.25+ oder 9.7

4. Credits

LAMINAR RESEARCH® for X-Plane®
Ben Supnik for [WED](#) (Version 1.2.1r3 used)
marginal for his [Sketchup-Plugin](#)
[Cami De Bellis](#) for a part of the used textures:

"As well if others scenery designers want to use some of my objects created by myself, in their custom package, feel free to do it."
